## ABSTRACT

Prior to your first thesis deposit, replace this text with the text of your scientific/ scholarly abstract. The text of this abstract should be double spaced and each new paragraph should be indented.

**This abstract is required for everyone except DMA and MFA students.**

## PUBLIC ABSTRACT

Prior to your thesis deposit, replace this text with the text of your public abstract. The text of this abstract should be double spaced and each new paragraph should be indented.

**This abstract is required for all thesis/dissertations.** This abstract may be up to 250 words and should be written for a non-academic lay audience. In writing your public abstract, avoid jargon and technical language as much as possible.

The ability to communicate research simply and clearly is an important skill. The public abstract helps convey ideas beyond one's immediate academic circle, facilitating communication with colleagues who do different kinds of work and possess different dimensions of training.

Think of your public abstract as your “elevator pitch” or what you might tell someone who asks, “What is your thesis about?” You may only have a few minutes to explain it to them while keeping their attention and using terminology you are sure they will understand without further lengthy explanation.

Another way to think of your public abstract is like the description you would read on the inside of a book cover.

## HEADING 1: MY CHAPTER 1

Heading 1 is the style you should use for the following headings in your thesis: List of Tables, List of Figures (List of Abbreviations, Schemes, and so on), Chapter titles, References, and Appendix titles. If you are writing in APA style, note that the titles formatted as Heading 1 do not count as an APA heading.

I want to cite something here (Zuo, Zhao, & Ni, 2019). I want to want to try cite Zuo, Zhao, and Ni (2019) with in-line style.

### **Heading 2: Use For Your Broadest Subheading Level, Centered, Bold, Title Case**

Heading 2 is the first major subheading style. If you are writing in APA style, this heading corresponds to a Level 1 APA heading.

### **Heading 3: Use For Your Next Heading Level, Left-aligned, Bold, Title Case**

Heading 3 is the second major subheading style. If you are writing in APA style, this heading corresponds to a Level 2 APA heading.

### ***Heading 4: This Heading is Left-aligned, Boldface Italics, Title Case***

This is an additional heading level, should your thesis require this level of specificity.

## APPENDIX A: NUMERIC DATA

The Appendix (A, B, and so on) heading is formatted as a Heading 1. Note that if you include only one Appendix, you do not need to assign it a letter.

Make a table in Appendix A:

Table A.1. Sample table

Column 1	Column	Column 3	Column 4	Column 5	Column 6
Row 1	12.34	12.34	12.34	12.34	12.34
Row 2	12.34	12.34	12.34	12.34	12.34
